Industry-Ready Technology Training

A program for engineering colleges

Transforming Students into Industry-Ready Engineers

About Sky Forge Solutions

Sky Forge Solutions Pvt. Ltd. is a Hyderabad-based company that delivers hands-on technology training for engineering students. We run instructor-led programs alongside the academic calendar, so students build practical skills in Python, Agentic AI and DevOps, supported by cloud training from an AWS Certified Professional.

How the program works

- **Entrance assessment:** each student is placed into a Python, Agentic AI or DevOps track.
- **Instructor-led training:** classroom sessions, guided labs and projects.
- **Exam every 15 days:** with written feedback shared with every student.
- **Certification:** a certificate from Sky Forge Solutions after course completion, based on agreed attendance and assessment criteria.
- **Placement assistance:** resume, GitHub portfolio, interview preparation and campus-drive readiness.

Learning tracks

Track	What students learn
Python	Python fundamentals, problem solving, Git and GitHub, data structures, automation and mini-projects.
Agentic AI	Python for AI, Generative AI and prompt design, AI APIs, retrieval-augmented generation basics, agents and tool calling, responsible AI.
DevOps	Linux and shell scripting, Git workflows, AWS cloud basics, Docker, CI/CD and a deployed project.

Semester-wise roadmap

Semester	Focus
1-1 / 1-2	Computer and digital fundamentals; developer-tool and version-control awareness.
2-1 / 2-2	Python, Git/GitHub, data structures, Linux and applied coding.
3-1	Cloud and DevOps: Linux, AWS, Docker and CI/CD.
3-2	Agentic AI and Linux project: AI APIs, RAG, agents and monitoring.
4-1	Capstone project: build, containerize, deploy and present.

Delivery options

- **Semester-wise integration:** both years and semesters planned with your academic calendar.
- **Intensive batch:** a condensed technical program for a vacation or pilot batch.
- **Single-semester pilot:** one or two semesters first, then review results before wider rollout.

Roles and responsibilities

Area	Sky Forge Solutions	College
Program delivery	Trainers, labs, assessments and projects	Classrooms, computer lab, internet and scheduling
Students	Entrance assessment and track placement	Nominate students and support attendance
Exams and feedback	Exam every 15 days with feedback	Facilitate exam conduct
Certification	Certificate after completion	Support completion criteria
Terms	Responsibilities, fees and schedule recorded in an MoU	Review and sign the MoU before the program starts
